Revenue is growing, but retention and activity quality remain significant risks

Upgrades consistently outweigh churn, yet 42% of users leave within their first year and suspected non-human activity distorts 70% of recorded session volume.

Session volume and Revenue grow together YoY

Year	Session Volume	Subscription Revenue
2021	6K	\$1,248.92
2022	31K	\$1,883.51
2023	68K	\$2,363.05
2024	119K	\$2,648.02

Key Findings

Upgrades consistently outweigh churn, driving year-over-year revenue growth.

Growth

87% of identified Free signups eventually upgrade, but 42% of users leave within their first year.

Conversion and Retention

Longer sessions are associated with more upgrades, while content preferences vary sharply by market

User Behaviour & Content

50% of users exhibit bot-like activity, distorting approximately 70% of recorded session volume

Risk & Action

Executive Revenue & Health Summary

Upgrades outpace churn by 4.6x, driving consistent revenue growth. Yet 42% of users leave within their first year, with the steepest decline occurring in months 3–5.

Free users drive signups and churn, while Premium users drive upgrades

Tier	Churn	Downgrade	Retention	Signup	Upgrade
Free	635	240	200	726	
Premium		96	301	164	574
Family			148	71	485

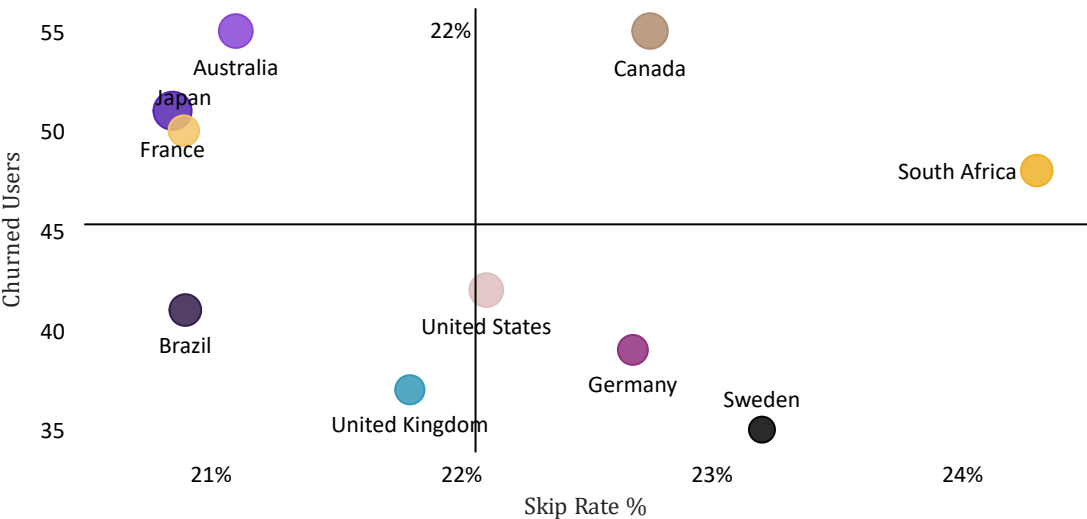

Recommendation Exposure Has Little Effect on Skip Rate

Genuine session volume is higher when recommendations are used, but skip rates remain similar.

Skip behaviour alone isn't a reliable churn signal.

Higher skip rates do not consistently correspond to higher churn across markets.

Revenue Erosion, Fraud Detection & Strategic Actions

Many of the platform's strongest engagement metrics are inflated by suspected non-human activity.
